

- Load student data table `dofile("student_data.lua")`
- Escape TeX-special characters coming from Lua strings function `tex_escape(str)` `return(str : gsub("[[: gsub(""`
- `"))` – `newline`
- `end`
- Convenience for checkbox columns (1-4) function `checkbox(level, col)` return `(level == col)` and `"boxtimes"` or `"Box"` end
